WORK EXPERIENCE

AI / ML Analyst

08.2021 – 07.2022

Techflames, Karachi, Pakistan

- Collected, cleaned, and preprocessed datasets using Python and SQL for machine learning applications
- Performed exploratory data analysis and feature engineering to improve model input quality
- Supported the development, training, and evaluation of machine learning models for predictive tasks
- Applied data preprocessing, validation, and model testing techniques to ensure reliable performance
- Worked with Python-based AI libraries and tools to analyse data and optimize model workflows
- Collaborated with technical teams to interpret results and improve AI solution performance

Trainee Data Analyst

09.2019 – 11.2020

Horizon Software Solutions, Karachi, Pakistan

- Collected, cleaned, and analysed business and product datasets using SQL, Excel, and reporting tools
- Built and maintained dashboards to track KPIs, product metrics, and operational performance
- Automated recurring reports to improve reporting efficiency and data consistency
- Collaborated with product teams to support testing, progress tracking, and issue resolution

EDUCATION

M.Sc. Computer Science

10.2022 – 05.2026

TH Bingen, Germany

Specializations: Database Systems, Data Mining, Artificial Intelligence, Project Management, System Analysis

Master's Thesis:

- Developed a model-based approach linking goal and behavioural models
- Analysed adaptive systems and translated requirements into structured technical representations

PROJECTS

VylexAI Analytics Platform

05/2026 – Present

Analytics Platform Developer

- Developed a FastAPI and Next.js analytics platform for contributor, network, investor, and health metrics.
- Built automated metric jobs, REST APIs, dashboard pages, and weekly investor PDF reporting.
- Implemented read-only PostgreSQL access, CI checks, Docker setup, and validation-focused backend workflows.

Customer Churn Analysis

- Built predictive models in Python to identify at-risk customers
- Generated insights to improve retention strategies

AI-Based Human Emotion Recognition

- Developed a CNN-based computer vision model for real-time facial emotion detection

- Implemented image processing techniques using OpenCV and trained models on labeled datasets
- Achieved reliable classification performance through model tuning and evaluation

Sales Performance Dashboard

- Automated data extraction and transformation using SQL
- Built dashboards to identify revenue gaps and support strategy decisions

TECHNICAL SKILLS

Programming Languages:	Python, SQL, Java
AI & Machine Learning:	Machine Learning, Deep Learning, CNNs, scikit-learn, OpenCV, Data Mining
Data Analysis & BI:	Pandas, NumPy, Power BI, Tableau, Excel, KPI Reporting, Dashboarding, A/B Testing
Blockchain:	Blockchain Fundamentals, Smart Contracts, Decentralized Applications

LANGUAGES

English (Fluent)

German (A2–B1)

Urdu (Native)

ADDITIONAL SKILLS

- Structured problem analysis in IT systems
- Understanding of processes and interface communication
- Requirements analysis and documentation
- Independent and solution-oriented working style
- Teamwork in interdisciplinary project environments

CERTIFICATES

- Machine Learning Specialization, Coursera
- Diploma in Data Analytics with Python, Alison
- PIAIC Artificial Intelligence Program
- Blockchain Basics, Coursera
- Agile Scrum Master Certification, Yale University
